Anatomy and Physiology Preapproved Courses Across Canadian Universities

Notes:

>All course weights have been converted to the McMaster unit system. A 3 unit course runs for one term (four months) and a 6 unit course for two terms (eight months).

>An 'x' beside both anatomy and physiology for a 3 unit course indicates that the course can be used for either the anatomy prerequisite OR the physiology prerequisite, not both. An 'x' beside both anatomy and physiology for a 6 unit course, however, is acceptable to satisfy both prerequisites.

McMaster University, MSc Physiotherapy Program
Anatomy and Physiology Preapproved Courses Across Canadian Universities

Notes:

>All course weights have been converted to the McMaster unit system. A 3 unit course runs for one term (four months) and a 6 unit course for two terms (eight months).

>An 'x' beside both anatomy and physiology for a 3 unit course indicates that the course can be used for either the anatomy prerequisite OR the physiology prerequisite, not both. An 'x' beside both anatomy and physiology for a 6 unit course, however, is acceptable to satisfy both prerequisites.
